

Perimeter and Physical Security

Synopsis

Physical security requirements have increased significantly. Executives must provide a safe and secure environment for their staff, while ensuring that controls do not infringe on employee rights or result in unnecessary delays in accessing facilities. This seminar is designed to provide the participants with the skills they need to perform a full proximity, perimeter and physical security assessment. The participants will learn how to conduct a structured, detailed threat analysis and to prepare risk assessments for each component of the review. Moreover, participants will learn how to implement facility, employee and executive security procedures. By the end of this session, the participants should be able to perform their first comprehensive security review of their facilities and employee and executive security.

Who Should Attend

This seminar is intended for Internal Auditors, Asset Protection Managers, and Loss Prevention and Security Officers.

Learning Objectives

At the end of this course, participants will be able to:

- Recognize common staffing, security, and accessibility issues.
- Perform a full proximity, perimeter, and physical security assessment.
- Identify potential threats.
- Conduct detailed threat analysis and risk assessment.
- Implement facility, employee, and executive security procedures.
- Determine countermeasure and detection procedures.
